Ementa da Disciplina:

- Diagnóstico e Planejamento para restauração dos dentes tratados endodonticamente (núcleo de preenchimento, endocrown, retentores intrarradiculares);
- Classificação dos retentores intrarradiculares (diretos e indiretos; metálicos, cerâmicos e fibrorresinosos);
- Propriedades dos materiais restauradores (sistemas adesivos, compósitos, pinos cerâmicos e fibrorresinosos e cimentos);
- Técnica restauradora (preparo do conduto, condicionamento das superfícies dentinária e dos pinos pré-fabricados; cimentação propriamente dita);
- Métodos de análise clínica e laboratorial empregados para avaliação do desempenho da técnica restauradora.
